

HEADGEAR HAVING ROTATABLE LIGHT ASSEMBLY

ABSTRACT

A headgear assembly that includes an article of headgear and an illumination assembly mounted on the article of headgear. The illumination assembly, in turn, includes an illumination source mounting assembly having a base that is attached to and supported by the article of headgear. A rotatable portion is rotatably supported by the base about at least one axis of rotation. An illumination source is supported by the rotatable portion and has a mass of less than 50 grams (weighs less than 1.77 ounces).
